

Aim and Scope of the Journal.

The International Journal of Scientific & Technological Development (IJSTD) is aimed at providing a platform for researchers, engineers, scientists and educators to publish their original research and reviews, to exchange new ideas and to disseminate information in innovative design, engineering experiences and technological skills. All papers submitted for publication in the IJSTD are selected through rigorous peer reviews to ensure originality, timeliness, relevance and readability.

The current emphasis of the journal includes the following areas: Materials Science, Life Sciences (Agricultural, Biological Sciences, Biochemistry, Genetics, Ecology, Aquatic Biology), Environmental Science, Immunology and Microbiology, Neuroscience, Marine Biology. Physical Sciences and Engineering (all branches of Engineering, Chemistry, Computer Science, IT Earth and Planetary Science, Energy, Mathematics, Physics and Astronomy), Health Science (Medicine and Dentistry, Nursing and Health), Pharmacology and Toxicology, Pharmaceutical Science, Veterinary Science etc.

Blind-peer review process is strictly followed for reviewing the submitted research work in the shape of research articles, case studies and book reviews. Anonymity of authors to reviewers and reviewers to authors will be ensured so as to make the review process fair and just.

Vision

The IJSTD' is a looking glass that reflects the ever-changing faces as well as the cerebral aspect of science and its application. It not only encompasses all the ideas of primary field of science and technology, but also equally concentrates on its applied aspects covering new technologies and innovation.
